

- **Sugarcane Aphid Tolerant**
- Exsertion is very good
- Leaves tend to be slightly drooping
- Panicle is semi-open with a bright red translucent grain color
- Awned spikelets, and purple plant color.

This medium-full season hybrid is the most flexible grain sorghum available. It responds to environmental variation by adjusting yield accordingly. Under limited moisture situations this hybrid is consistent in its yield, but when greater moisture amounts are available yield levels increase significantly.

Coupled with tolerance to the Sugarcane Aphid, this hybrid has excellent resistance to head smut. Tillering capacity is good and will produce 2-3 tillers that are synchronous with the main panicle at flowering/maturity.

Plant Characteristics

Grain Color	Plant Color	Standability	Plant Height		Panicle Type	Panicle Exsertion	Threshability	Grain Color Planted	
Red	Purple	5	40-45 in.		SO	5	5	Red T	
Maturity/Yield					Disease & Pest Reaction				
Days to 50% Anthesis	Harvested Grain Tannin	Pre-Flower Stress Tolerance	Irr. Bu/Ac	Irr. Lbs/Ac	Head Smut	Fusarium	MDMV	Downy Mildew	Greenbug Resistance
64-67	None	5	150-170	7000-9000	5	4	5	5	C&E

Standard Rating:

A standard 5 point rating system is used unless otherwise indicated. Ratings are based on comparison with other products of like maturity.

1.....Poor

5.....Excellent
