

# Southern Harvest 90G6

- Bright red-translucent grain color
- Seed size is larger than regular grain sorghum hybrids and is quite vitreous
- Excellent stalk strength
- High level of stay green

This medium-late maturing hybrid has a purple plant color, although glumes tend to be reddish-straw. It is moderately resistant to anthracnose and other foliar diseases. The hybrid is of medium height (3-dwarf) and stands well for combine harvesting and threshes free of glumes. It has excellent drought resistance and is adapted to regions of limited rainfall. Yield is excellent under both rain-fed and irrigated conditions.
