

Southern Sweet

- Brown Midrib
- Late-Maturity sorghum-sudangrass
- High palatability
- Multi-purpose forage
- Wider harvest window
- Higher protein and digestibility than conventional sorghum-sudangrass hybrids
- High green leaf retention
- Excellent drought resistance
- Excellent tillering, regrowth, and recovery

Brown Midrib gives more value to this later maturing hybrid. The late maturity concept produces hybrids that are 20-30 days later than conventional sorghum-sudangrass hybrids. This late maturity allows a wider window for harvest of high quality leaves before boot stage is reached. This LM/BMR hybrid produces greater IVTD values and a higher crude protein. IVTD of this BMR hybrid was 20+% more than a commercial check in trials. This hybrid has a wide range of adaptation because of its excellent drought resistance and yield of quality forage for direct pasture and hay.

Plant Characteristics

| Plant Color | Plant Texture | Standability | Plant Height | Panicle Type | Midrib Type | Tillering & Regrowth Capacity | Grain Color Planted |
|-------------|---------------|--------------|--------------|--------------|-------------|-------------------------------|---------------------|
| Purple | Juicy | 5 | 7-8 ft. | Sudan | BMR | 4-5 | Red |

|----------------------|------------------------|--------------|-----------------------------------|------------------|--------------------|--------------------------|----------------------|----------------------------|
| 90-95 | No | H/G | 25-30 | 17,000 | 5-15 | 15-20 | 10-15 | 35-40 |

Standard Rating:

A standard 5 point rating system is used unless otherwise indicated. Ratings are based on comparison with other products of like maturity.

1.....Poor

5.....Excellent

** Agronomic data are insufficient to make a rating at this time
